

Improve Security Equipment Uptime

Through Remote Monitoring & Management

THE NEED

LACK OF COMPREHENSIVE VISIBILITY
Tools falling short in offering a single pane of glass view across your fleet.

SURFACE-LEVEL MONITORING
Settling for basic device pings means missing the true story of endpoint health and performance.

REACTIVE SUPPORT
Customer's flag issues, creating a constant state of support "firefighting".

MANUAL MANAGEMENT
Manual efforts and onsite visits to address device health issues.

EXPERIENCE CANOPY

Our leading RMM platform built for security and surveillance solutions.

Ensure technology always stays up and operational, even in the most challenging environments.

THE APPROACH

UNIFIED MONITORING

Consolidate your tech monitoring under one platform.

PROACTIVE ALERTS

Stay ahead with real-time notifications, addressing issues before they escalate.

LABOR EFFICIENCY

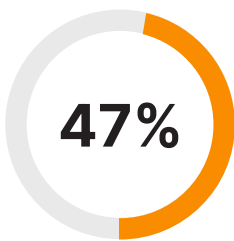

Automate remote triage, DevOps, and development tasks, significantly reducing manual efforts through automated device actions.

CLIENT-CENTRIC DASHBOARDS

Offer customized views with real-time metrics and uptime reports for all your clients.

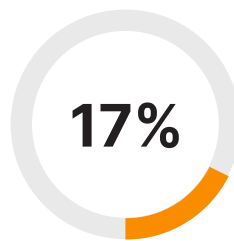

THE RESULTS

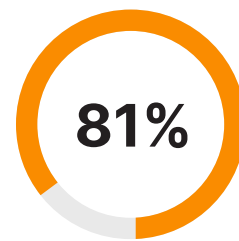

47%

Fewer customer/user issue calls

17%

Reduction in onsite visits with self-healing automations

81%

Reduction in maintenance cost from on-site support
